## CV

ArtWorks Mural Design Collective are a group of artists with learning disabilities and, or autism who are supported by professional creatives based in South Yorkshire.

Since 2017 our artists have designed and created numerous customised murals for private clients and community-led projects. We regularly work in collaboration with SEN schools, colleges and other organisations through providing creative art workshops, and leading community art projects.

Some of our most notable projects include three large commissions from Wentworth Woodhouse which involved designing and creating murals for the walkway into their gardens, an installation in their new garden cabins, and also four large scale hoarding boards that were part of their rooftop tour exhibit.

We have also created murals for Bloc Projects, Theatre Deli, The Local Theatre and SWFC. Our most recent commission is for Sheffield Museums, which involves creating a design for a large scale vinyl mural which will be in situ for four years in the glass entrance to Millennium Galleries.

This piece of artwork is going to be the most prominent mural in Sheffield city centre, and will be seen by thousands of people everyday when installed at the end of Autumn 2022.

ArtWorks are leaders in promoting disability-led public art and have a clear focus on empowering and encouraging our artists and future artists with disabilities. Our mural design collective offers our artists the opportunity to develop skills and provides a supported transition into the creative workplace. We are passionate about helping our artists find sustainable, fulfilling work which focuses on their strengths and abilities. We believe our model provides the support and opportunities for our artists to grow as a team and independently and will empower them to continue to work in the creative industries into the future.
